IT Security Awareness Training

All Users - Everyone must take this training - Management and Privileged Users included.

Security Policies

Welcome to the 2004 Information Technology Security Awareness Training.

For this training year, we have arranged all of the IT Security Awareness training in a single place and moved the content into modules. This will allow you to complete the text portion of the training at your own pace, and proceed to the test portion once you are comfortable with the material. Please feel free to return to this web site to review the training material throughout the year.

Credit for the training will be granted once you successfully complete a test. You must complete the required training once every year (February 1st. to December 15th.) in order to maintain your access to USA managed IT resources.

Click on the buttons below or on the left menu.

Once you have scrolled to the desired menu area, click on the buttons in the menu to take the course subjects or to go to the course test.

Remember to print the certificate of completion for your records once you complete the test.

If you don't want to review the course material and wish to go directly to the test click on this button:

Go to the Test

The course subjects are:

Security Awareness IT Security Awareness Training - Everyone that uses USA managed IT resources must complete this training.
